Beginning Monday, August 6<sup>th</sup> 2012 the south doors of Building “A” of the Municipal Complex at 201 West Gray Street will be closed for one week for renovation of the entry portion of the lobby. The Planning Department and Public Works Department and staff members that office in the building will conduct business as usual during the renovation. The Building Permit staff, previously located in the lobby, have been moved into temporary offices in conference rooms. All permit related business will be conducted as usual.

The general public and the building community are asked to access the building through the northeast and northwest doors of the building. There will be signage on all sides of the building except the northern side that runs along Daws Street to assist persons entering the building.

The public will have access to the main (south) entrance of Building “A” once the entry portion of the lobby is complete; however, the renovation of the remaining portion of the lobby will be ongoing though mid-September. The overall renovation of Building “A” will allow staff to provide improved customer service to the public.

Additional questions may be directed to the Building “A” Project Managers, Scott Sturtz, City Engineer at 366-5350 or Brenda Wolf, Permit Services Supervisor at 366-5415.
